

## SOFTWARE LICENSE AGREEMENT

NEC Corporation (hereinafter called "NEC") grants certain license to the user of NEC's UNIVERGE BX series (hereinafter called "you") pursuant to the terms and conditions of this Software License Agreement (hereinafter called the "Agreement"), to install the software (in case of UNIVERGE BX9000) to your server (hereinafter called the "Server"), or to use the software embedded in the UNIVERGE BX series products or Server (hereinafter called the "Software") and related documents (hereinafter called the "Documents") (the Software and the Documents collectively called the "Licensed Products") (UNIVERGE BX series products and Server collectively called the "Machine"). PLEASE READ THIS AGREEMENT CAREFULLY BEFORE USING THE LICENSED PRODUCTS. BY INSTALLING (BY YOURSELF OR BY INSTRUCTION TO A THIRD PARTY) OR USING THE SOFTWARE, YOU ARE AGREEING TO BE BOUND BY THE TERMS AND CONDITIONS OF THIS AGREEMENT. IF YOU DO NOT ACCEPT AND COMPLY WITH THIS AGREEMENT, YOU MAY NOT USE THE LICENSED PRODUCTS, EVEN FOR THE TRIAL PURPOSE.

### 1. License

- (1) Subject to the terms and conditions set forth herein, NEC grants to you the non-transferable, non-exclusive and limited license, to install the Software to Server (in case of UNIVERGE BX9000), or to use the Software in accordance with the Documents.
- (2) Except as otherwise expressly stated herein, you shall not (i) copy, modify, translate, quote or create any derivative work of all or any part of the Licensed Products, (ii) sell, rent, lease, distribute, sublicense or otherwise transfer all or any part of the Licensed Products except as set forth in Section 1(4) below, (iii) reverse engineer, decompile, reverse assemble or otherwise attempt to gain access to the source code of all or any part of the Software, (iv) remove, alter, cover or obfuscate any copyright notices, trademark notices or other proprietary rights notices placed or embedded on or in the Licensed Products, (v) use all or any part of the Software other than on the Machine, (vi) use the Licensed Products for the development of any application program for commercial use, (vii) use any component of the Software by linking (whether statically or dynamically) to any component not part of the Software, (viii) use the Licensed Products in life support systems, human implantation, nuclear facilities or systems or any other application where failure could lead to a loss of life or catastrophic property damage, or (ix) cause or permit any third party to do any of the foregoing.
- (3) Upon giving prior written notice to you, NEC shall have the right to audit your use, deployment, and exploitation of the Licensed Products for the purpose of confirming whether you comply with the terms and conditions of this Agreement. Such audit shall be conducted during regular business hours at your site and in such a manner as not to interfere unreasonably with your normal business activities.
- (4) You may transfer your rights and obligations under the terms and conditions of this Agreement to a third party, provided, however, that the following conditions shall be fulfilled; (i) such third party agrees to be bound by all the terms and conditions of this Agreement, (ii) you transfer all the Licensed Products and the Machine to such third party, and (iii) such transfer does not violate Export Administration Regulations by the US Government and the applicable laws, regulations and administrative guidance of any country having competent jurisdiction.

### 2. Intellectual Property Rights

Nothing in this Agreement shall be construed as transferring any or all intellectual property rights in, and to, the Licensed Products and all the update versions thereof, whether or not provided by NEC. You agree that NEC or its licensors shall retain such intellectual property rights, whether or not any part thereof is or may be copyrighted or patented.

### 3. No Warranty

- (1) NEC PROVIDES THE LICENSED PRODUCTS "AS IS" AND MAKES NO WARRANTY OF ANY KIND WHETHER EXPRESS OR IMPLIED (EITHER IN FACT OR BY OPERATION OF

## LAW) WITH RESPECT TO THE LICENSED PRODUCTS.

- (2) In the event that NEC makes the update version, function added version, bug-fix version, or modification of the Licensed Products or program to be such (hereinafter collectively called the "Updated Program"), NEC may, at its sole discretion, provide you with the Updated Program or the information related to the Updated Program in accordance with the Software Support Agreement separately entered into between NEC and you provided, however, that NEC may, at its discretion, provide the Updated Program and related information at the timing and in the manner determined by NEC. The Updated Program shall be deemed as a part of the Licensed Products.

### 4. Termination

- (1) You may terminate this Agreement by giving NEC a prior written notice.
- (2) In the event that you fail to comply with any provision of this Agreement, NEC may, at any time, terminate this Agreement.
- (3) After any termination of this Agreement, you shall not use the Licensed Products for any purpose and shall immediately delete or destroy all the Licensed Products. Sections 1(2), 1(3), 2, 3, 4(3), 5, 6, 7 and 8 shall survive any termination of this Agreement.

### 5. Export Control

In any event, you agree that you will export or re-export the Licensed Products to any country, person or entity subject to any export restrictions and orders of Japan, the United States and any other country having competent jurisdiction.

### 6. Limitation of Liability

IN NO EVENT SHALL NEC ITS SUPPLIERS AND ITS DISTRIBUTORS BE LIABLE TO YOU FOR ANY INDIRECT, SPECIAL, INCIDENTAL, CONSEQUENTIAL OR PUNITIVE DAMAGES (INCLUDING LOSS OF PROFITS AND PROCUREMENT COSTS FOR ANY SUBSTITUTE), ON ACCOUNT OF OR ARISING OUT OF USE OF THE LICENSED PRODUCTS OR IMPOSSIBILITY THEREOF, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. AND ITS DISTRIBUTORS, THE MAXIMUM AGGREGATE LIABILITY OF NEC, ITS SUPPLIERS AND ITS DISTRIBUTORS, WHETHER IN TORT, CONTRACT OR ANY OTHER LEGAL THEORY, SHALL NOT EXCEED ONE HUNDRED PERCENT (100%) OF THE RESPECTABLE AMOUNT ACTUALLY PAID FOR PURCHASING THE LICENSED PRODUCTS BY YOU.

### 7. General Provisions

- (1) This Agreement shall be governed by and interpreted in accordance with the laws of Japan.
- (2) All disputes arising out of or in relation to this Agreement shall be submitted to the exclusive jurisdiction of the Tokyo District Court as the court of the first trial.
- (3) This Agreement constitutes the entire agreement between you and NEC and supersedes any and all oral or written agreements previously existing between you and NEC with respect to the subject matter hereof.
- (4) U.S. Government License Rights to U.S. Government End Users: The Licensed Product is a "commercial item" as that term is defined in 48 C.F.R. 2.101, consisting of "commercial computer software" and "commercial computer software documentation" as such terms are used in 48 C.F.R. 12.212. Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4, NEC provides the Licensed Products to U.S. Government End Users only pursuant to the terms and conditions therein.

### 8. Open Source Software

The Software may contain the Open Source Software (hereinafter called the "OSS"), which shall be granted under the licenses specified in the following. Such OSS is not subject to the terms and conditions of this Agreement but those of the applicable license.

This software has been written for the Internet Software Consortium by Ted Lemon in cooperation with Vixie Enterprises.

This client was substantially modified and enhanced by Elliot Poger for use on Linux while he was working on the MosquitoNet project at Stanford.

The current version owes much to Elliot's Linux enhancements, but was substantially reorganized and partially rewritten by Ted Lemon so as to use the same networking framework that the Internet Software Consortium DHCP server uses. Much system-specific configuration code was moved into a shell script so that as support for more operating systems is

added, it will not be necessary to port and maintain system-specific configuration code to these operating systems - instead, the shell script can invoke the native tools to accomplish the same purpose.

firewall (Jungo Firewall)

http\_parse is responsible for parsing the HTTP headers.

Copied from tproxy.c from the transproxy package by John Saunders available from <ftp://ftp.nlc.net.au/pub/unix/transproxy/> Here is the original comment from the top of the file. tproxy.c:

This is a transparent proxy server. It can be started from inetd to service HTTP requests, or run as a stand-alone daemon. HTTP requests are transparently accepted and passed to the WWW proxy cache for handling. The HTTP request line is modified into a form usable by the WWW proxy cache. The destination WWW site name is extracted from the HTTP headers to avoid DNS lookups. NORTHLINK COMMUNICATIONS PTY LTD - BSD Style License.

Definitions for RIPv2 routing process.

This code is based on the 4.4BSD `routed` daemon, with extensions to support:

RIPv2, including variable length subnet masks. aggregate routes in the kernel tables. aggregate advertised routes. maintain spare routes for faster selection of another gateway when the current gateway dies. timers on routes with second granularity so that selection of a new route does not wait 30-60 seconds. tolerance of static routes. tell the kernel hop counts do not advertise if ipforwarding=0

The vestigial support for other protocols has been removed. There is no likelihood that IETF RIPv1 or RIPv2 will ever

be used with other protocols. The result is far smaller, faster, cleaner, and perhaps understandable.

The accumulation of special flags and kludges added over the many years have been simplified and integrated.

ssh (Secure Shell)

This file is part of the OpenSSH software.

The licences which components of this software fall under are as follows. First, we will summarize and say that all components are under a BSD licence, or a licence more free than that.

OpenSSH contains no GPL code.

\* Copyright (c) 1995 Tatu Ylonen ylo@cs.hut.fi , Espoo, Finland

\* All rights reserved

\*

\* As far as I am concerned, the code I have written for this software

\* can be used freely for any purpose. Any derived versions of this

\* software must be clearly marked as such, and if the derived work is

\* incompatible with the protocol description in the RFC file, it must be

\* called by a name other than "ssh" or "Secure Shell".

[Tatu continues]

\* However, I am not implying to give any licenses to any patents or

\* copyrights held by third parties, and the software includes parts that

\* are not under my direct control. As far as I know, all included

\* source code is used in accordance with the relevant license agreements

\* and can be used freely for any purpose (the GNU license being the most

\* restrictive); see below for details.

[However, none of that term is relevant at this point in time. All of these restrictively licenced software components which he talks about have been removed from OpenSSH, i.e.,

RSA is no longer included, found in the OpenSSL library

IDEA is no longer included, its use is deprecated

DES is now external, in the OpenSSL library

GMP is no longer used, and instead we call BN code from OpenSSL

Zlib is now external, in a library

The make-ssh-known-hosts script is no longer included

TSS has been removed

MD5 is now external, in the OpenSSL library

RC4 support has been replaced with ARC4 support from OpenSSL

Blowfish is now external, in the OpenSSL library

[The licence continues]

#include

SYSLOG -- print message on log file

This routine looks a lot like printf, except that it outputs to the log file instead of the standard output. Also:

adds a timestamp,

prints the module name in front of the message,

has some other formatting types (or will sometime),

adds a newline on the end of the message.

The output of this routine is intended to be read by syslogd(8).

Author: Eric Allman

Modified to use UNIX domain IPC by Ralph Campbell

Patched March 12, 1996 by A. Ian Vogelesang vogelesang@hdshq.com

- to correct the handling of message & format string truncation,

- to visibly tag truncated records to facilitate investigation of such Bad Things with grep, and,

- to correct the handling of case where "write"

returns after writing only part of the message.

Rewritten by Martin Mares mj@atrey.karlin.mff.cuni.cz on May 14, 1997

- better buffer overrun checks.

- special handling of "%m" removed as we use GNU sprintf which handles it automatically.

- Major code cleanup.

Modified, Sun Feb 20 2000, kalium@gmx.de Added fix operation allowing to reorder primary/extended partition entries within the partition table. Some programs or OSes have problems using a partition table with entries not ordered according to their positions on disk. Munged this patch to also make it work for logical partitions. aeb, 2000-02-20.

Ganymed SSH-2 for Java

Ganymed SSH-2 for Java is a library which implements the SSH-2 protocol in pure Java. It supports SSH sessions (remote command execution and shell access), local and remote port forwarding, local stream forwarding, X11 forwarding, SCP and SFTP. There are no dependencies on any JCE provider, as all crypto functionality is included.

CentOS (Linux distribution)

CentOS is an Enterprise-class Linux Distribution derived from sources freely provided to the public by a prominent North American Enterprise Linux vendor. CentOS conforms fully with the upstream vendors redistribution policy and aims to be 100% binary compatible. (CentOS mainly changes packages to remove upstream vendor branding and artwork.)

<http://www.centos.org>

CentOS distribution contains software components subject to different open-source licenses, including (but not limited to) the GNU General Public License (GPL) and Lesser General Public License (LGPL). The license agreement for each software component is located in the software component's source code.

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or

additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for

inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

AGENT++ (SNMP agent)

AGENT++ is a set of C++ classes which provides a complete protocol engine and dispatch table for the development of SNMP agents. AGENT++ is a multilingual API which supports SNMPv1, SNMPv2c, and SNMPv3. It provides various C++ classes implementing prototypes for scalar and table SNMP managed objects that can be customized by derivation. Additional classes support the development of proxy agents as well as sending notifications.

<http://www.agentpp.com>

AGENT++ library is licensed under proprietary open-source license (see below), that permits use, modification and distribution in binary form even for commercial purposes, provided that the AGENT++ library is only distributed

- (a) as linked binary to a software that significantly adds value to the library itself and
- (b) not bundled with any AGENT++ documentation

AGENT++ library is used to implement SNMP agent functionality on Mediant 5000, Mediant 8000 and IPmedia 8000 products.

## LICENSE AGREEMENT

WHEREAS, Frank Fock and Jochen Katz are the owners of valuable intellectual property rights relating to the AGENT++ API and wish to license AGENT++ subject to the terms and conditions set forth below;

and

WHEREAS, you ("Licensee") acknowledge that Frank Fock and Jochen Katz have the right to grant licenses to the intellectual property rights relating to AGENT++, and that you desire to obtain a license to use AGENT++ subject to the terms and conditions set forth below;

Frank Fock and Jochen Katz grants Licensee a non-exclusive, non-transferable, royalty-free license to use AGENT++ and related materials without charge provided the Licensee adheres to all of the terms and conditions of this Agreement.

By downloading, using, or copying AGENT++ or any portion thereof, Licensee agrees to abide by the intellectual property laws and all other applicable laws of Germany, and to all of the terms and conditions of this Agreement, and agrees to take all necessary steps to ensure that the terms and conditions of this Agreement are not violated by any person or entity under the Licensee's control or in the Licensee's service.

Licensee shall maintain the copyright and trademark notices on the materials within or otherwise related to AGENT++, and not alter, erase, deface or overprint any such notice.

Except as specifically provided in this Agreement, Licensee is expressly prohibited from copying, merging, selling, leasing, assigning, or transferring in any manner, AGENT++ or any portion thereof.

Licensee may copy materials within or otherwise related to AGENT++ that bear the author's copyright only as required for backup purposes or for use solely by the Licensee.

Licensee may not distribute in any form of electronic or printed communication the materials within or otherwise related to AGENT++ that bear the author's copyright, including but not limited to the source code, documentation, help files, examples, and benchmarks, without prior written consent from the authors. Send any requests for limited distribution rights to fock@agentpp.com.

Licensee hereby grants a royalty-free license to any and all derivatives based upon this software code base, that may be used as a SNMP agent development environment or a SNMP agent development tool.

Licensee may modify the sources of AGENT++ for the Licensee's own purposes. Thus, Licensee may not distribute modified sources of AGENT++ without prior written consent from the authors.

The Licensee may distribute binaries derived from or contained within AGENT++ provided that:

- 1) The Binaries are not integrated, bundled, combined, or otherwise associated with a SNMP agent development environment or SNMP agent development tool; and
- 2) The Binaries are not a documented part of any distribution material.
